

P300

Portable Temperature Meter with probe NTC Type P300

Portable, precise temperature meter type P300 with probe NTC (thermistor) has been designed for temperature measurement of medium which does not need continuous monitoring or which place of measure is various.

The advantages of this instrument are: resistance to splashing (IP54); additionally illuminated display LCD, the possibility of connecting sensor with meter and leading measurement by one hand, storing the results, and storing max. and min. of measurement value.

Technical specification

Range of measurement : NTC (thermistor): from -40°C to +200°C

Accuracy :

- ±0,5°C: from 0°C to +100°C
 - ±1,0°C: of the range

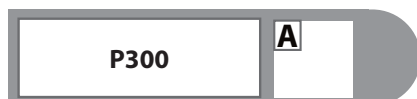

Resolution: 0,1°C

Voltage : 2 x 1,5V AA, life of battery about 160 hours .

Weight : 240g

Operating temp. : from 0°C to +50°C

Ordering Information

A Additional options

W

Esthetic plastic suitcase

Ordering Example : P300-W

stands for: Portable temperature meter type P300 with sonde and esthetic plastic suitcase.
